

# UniPercept-Constructed Image Profile

IAA Rating: 29/100

IQA Rating: 35/100

ISTA Rating: 46/100

## Image Aesthetics Assessment (IAA)

### Compostion & Design

- The composition is nonexistent, with a completely blurred and indistinct subject ...*
- There is no balance or rhythm to speak of. The elements are randomly scattered ...*

### Technical Execution

- The image exhibits catastrophic technical execution.*
- Every possible mistake is present, with extreme blurriness rendering all details invisible.*
- The focus is nonexistent, resulting in a complete lack of sharpnessness.*

...

### Comprehensive Evaluation

- The image suffers from extreme blurriness, rendering any aesthetic evaluation impossible.*
- The lack of focus eliminates any potential visual impact, technical merit, or depth. Every element, from the pergola to the lanterns, is indistinct, failing to convey any meaningful ...*
- In summary, the image's total absence of visual coherence results in a zero aesthetic merit.*

## Image Quality Assessment (IQA)

### Distortion Location

- The entire scene, including the pergola, lanterns, and background foliage, is out of focus, resulting in a complete loss of sharpnessness. This blurring affects every element uniformly, making it impossible to identify ...*
- The image fails to convey any meaningful content due to its total lack of clarity.*

### Distortion Severity

- The image suffers from extreme blurriness.*
- This catastrophic blurring negates any possible evaluation of other distortion types, as nothing is visible.*
- The final distortion severity is the maximum imaginable.*

...

### Overall Quality

- The image is severely out of focus, rendering all elements indistinct and lacking any discernible detail.*
- The lack of sharpnessness, exposure, and any visible content results in a complete failure in image quality. This extreme blurriness negates any possible merit, making it impossible to evaluate any positive attributes.*
- In summary, the image quality is catastrophic, with zero merit due to total blurriness.*

## Image Structure & Texture Assessment (ISTA)

### Scene Decomposition Principles

- Scene Type:** *Blurred Composite Scene*
- Scene Name:** *Garden with pergola and hanging lights*

### Componet: Pergola

- Physical Structure:** *[Base Morphology: Lined] [Arrangement: Horizontal]*
- Material Representation:** *[Material Class: Glass] [Surface Properties: Glossy]*
- Geometric Composition:** *[Volumetric Form: Sphere]*

### Componet: Background Foliage

- Physical Structure:** *[Base Morphology: Matted] [Arrangement: Layered]*
- Material Representation:** *[Material Class: Foliage] [Surface Properties: Matte]*
- Geometric Composition:** *[Volumetric Form: Naturalistic]*

### Componet: Hanging Lights

- Physical Structure:** *[Base Morphology: Smooth] [Arrangement: Clustered]*
- Material Representation:** *[Material Class: Glass] [Surface Properties: Glossy]*
- Geometric Composition:** *[Volumetric Form: Sphere]*

...
